Our choice for the main acquisitive prize is Jennifer Goodman's *Fugue*<sup>2</sup>, 2006. This abstract work sits firmly within a strong tradition of geometrical abstraction in Australia, but this painting manages to rework the genre in a manner that combines subtlety, harmony and balance in the most effective manner. We believe this work possesses an almost spiritual power derived from the juxtaposition of rich cool tones. We both offer our congratulations to Jennifer Goodman and the City of Darebin.
